Autism Spectrum Disorder & Intellectual Disability Disorder – Psychotherapeutic Medication Recommendations for Target Symptoms in Children and Adolescents

**January 22, 2016, 12:00pm – 1:00pm**

Children and adolescents living with autism spectrum disorder (ASD) or intellectual disability (ID) that are chronic in nature are an unique and vulnerable population with special health care needs. Given the complexity of these disorders and the high prevalence of comorbid conditions, these children and their families will require a wide range of medical, behavioral and community services. Please join us as Dr. Tanya Murphy will review the updated evidence-based guidelines produced by The Florida Medicaid Drug Therapy Management Program.

**Speaker:** Tanya Murphy, MD, MS

*Dr. Tanya Murphy completed medical school, psychiatric residency, and a fellowship in child psychiatry at the University of Florida. She is board certified in general psychiatry, child and adolescent psychiatry, and in 2002, earned a Master of Science in Clinical Investigation. She is a Professor of Pediatrics and Psychiatry and the Maurice A. and Thelma P. Rothman Chair of Developmental Pediatrics at the University of South Florida. Dr. Murphy is the Director of the Rothman Program for Neuropsychiatry that specializes in the assessment and treatment of obsessive compulsive disorder, other anxiety disorders, tic disorders, autism spectrum disorders, and learning disabilities.*
