Medications for Managing Pediatric Sleep Disorders

May 6, 2016, 12:00pm – 1:00pm

Dr. Daniel Castellanos will present an overview of pediatric sleep disorders and address the treatment of these disorders, with emphasis on evidence based use of medications.

Speaker: Daniel Castellanos, MD

Dr. Castellanos is an Assistant Dean for Graduate Medical Education, Founding Chair of the Department of Psychiatry & Behavioral Health and Professor of Psychiatry and Behavioral Health and Pediatrics at the Florida International University Herbert Wertheim College of Medicine. His career has focused on education and policy development regarding the appropriate use of psychotropic medications in children and adolescents. Dr. Castellanos has developed a statewide psychotropic medication training program for child welfare professionals and published a book for juvenile judges entitled "Psychotropic Medication Reference."
